The R Project for Statistical Computing

Getting Started

R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS. To **download R (https://cran.r-project.org/mirrors.html)**, please choose your preferred CRAN mirror (https://cran.r-project.org/mirrors.html).

If you have questions about R like how to download and install the software, or what the license terms are, please read our answers to frequently asked questions (https://cran.R-project.org/faqs.html) before you send an email.

News

- **R version 4.6.2 (Diversified Portfolio)** (https://cran.r-project.org/src/base/R-4) has been released on 2026-10-29.

- Kalibera Family Fund (/foundation/kalibera.html) accepts donations until the end of 2026.
- **R version 4.5.3 (Reassured Reassurer)** (https://cran.r-project.org/src/base/R-4) (wrap-up release) was released on 2026-03-11.
- The **useR! 2026** (https://user2026.r-project.org) conference took place in Warsaw, Poland, July 7-9.
- You can support the R Foundation with a renewable subscription as a supporting member (https://www.r-project.org/foundation/donations.html).

The Roussew Prize for Statistics put up a very nice page for the 2026 laureates, the #RStats Core team listing both the singled out key members and all other R Core members, past, present and even recent. Very well done -- and again sincere congratulations!
