The R Project for Statistical Computing

Getting Started

R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS. To **download R** (<https://cran.r-project.org/mirrors.html>), please choose your preferred CRAN mirror (<https://cran.r-project.org/mirrors.html>).

If you have questions about R like how to download and install the software, or what the license terms are, please read our answers to frequently asked questions (<https://cran.R-project.org/faqs.html>) before you send an email.

News

All R-Forge users will be notified in the next days with more details. Everyone is encouraged to migrate to other services soon.

I migrated my projects to [#Codeberg](#) and wrote up a how-to in blog post – also useful for GitHub/GitLab/etc.

 After 20 years of service, the R-Forge code-sharing platform will be retired. [#rstats](#)

Timeline:

- Until end of 2026: Normal operations.
- Jan 2027: Switch to read-only, but SVN continues to work.
- Jan 2028: SVN also read-only.

Reason: The underlying FusionForge software is no longer maintained.
