The R Project for Statistical Computing

Getting Started

R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS. To **download R (https://cran.r-project.org/mirrors.html)**, please choose your preferred CRAN mirror (https://cran.r-project.org/mirrors.html).

If you have questions about R like how to download and install the software, or what the license terms are, please read our answers to frequently asked questions (https://cran.R-project.org/faqs.html) before you send an email.

News

- **R version 4.6.2 (Diversified Portfolio)** (https://cran.r-project.org/src/base/R-4) has been released on 2026-10-29.

- Kalibera Family Fund (/foundation/kalibera.html) accepts donations until the end of 2026.
- **R version 4.5.3 (Reassured Reassurer)** (https://cran.r-project.org/src/base/R-4) (wrap-up release) was released on 2026-03-11.
- The **useR! 2026** (https://user2026.r-project.org) conference took place in Warsaw, Poland, July 7-9.
- You can support the R Foundation with a renewable subscription as a supporting member (https://www.r-project.org/foundation/donations.html).

How did R, the free statistical open-source software ecosystem, become the world's leading tool for statistical data analysis and visualization?

Discuss this with the recipients of the #RousseeuwPrize for Statistics: https://wu.at/matters-111126-bs-en

Note that this from a piece by Achim @zeileis.org who of course generally makes very sound technical choices. But it is not an official endorsement of one hosting platform over another. They are all equally welcome as long as the #Rstats code on them remains open source. 😉
